

A program  
featuring everything you wanted to know about  
**Trash, Recycling and Composting**  
in Johnson County

Beginning in 2012, Johnson County residents will be sending less waste to landfills with these expanded services: **Unlimited Curbside Recycling, Curbside Collection of Yard Waste for Composting and Volume Based Trash Pricing.** Come attend one of these two events for a virtual tour of our waste and recyclables after they leave the curb and get all your questions answered:

**What really happens to my recyclables after they leave the curb?**

**How do landfills work and why reduce waste to landfills?**

**What do I do with my yard waste after January 2012?**

**How can I compost at home?**

**What is volume-based pricing and how will it affect my trash bill?**

**Join us one of these two evening programs:**

(no RSVP necessary)
